

Applications **Strapping and Lifting**

Suitable products

PARAWEB® in Lifting

The high tensile strength and modulus of **PARAWEB®** make it an ideal material to use in a variety of lifting applications. A historical application of **PARAWEB®** is its use to make slings for cargo transit.

PARALOOPS in Strapping

The long design life and high tensile strength of **PARALOOP®** make it an excellent choice of material for strapping systems. For more information relating to the applications of **PARALOOP®** strapping systems, [see sub sea applications](#).
